QuickStart BC Distribution– Schedule

Day 1: Master Data Setup

- Create your virtual Distribution systems with all the relevant business information, including custom units of measurement, storage space/ allocation and logistical processes.
- Creation of a Sandbox environment for testing and training purposes.

Day 2: Inventory Setup

- Set up of your Inventory. Includes all items in the catalogue to bring over to your new system (we advise clients to use this as an opportunity to remove outdated and/or superseded stock).
- Additional product information, links and supporting documents may also be attached, For more information on these please speak to your sales consultant.

Day 3: User Setup

- Setup of system users, permission sets and any necessary device licenses ready for your system users.

Day 4: Opening Balances & Training

- Deliver online training material (training is done via Dynamics 365 University)
- User Acceptance Training (UAT) and
- Import inventory & opening balances ready for go-live

Day 5: Go Live

- Push your system live
- Support staff with any issues or questions and ensure deployment is as seamless as possible

About QuickStart BC

QuickStart BC is our packaged deployment of Business Central, Microsoft's cloud ERP application.

Our QuickStart approach allows organisations to enjoy business transformation delivered at speed

Alongside our main QuickStart Finance deployment, we develop a range of add ons to fulfil the following additional functionality:

- **Sales**
- **Marketing**
- **Warehousing**
- **Manufacturing**
- **Field Service**
- **Purchasing**

For more information on any of these modules, or to arrange a demo, please get in touch:
